Open Ended Feedback By Question

What aspects of this course were most beneficial to you?

Comments
Learning the Scala language was really cool (C++'s pattern matching proposal looks like Scala's pattern matching, so that's awesome). Scala helped me understand different aspects of languages and language design.

I have gained much knowledge by doing this course, I hope this knowledge helps me in my future.

What suggestions do you have that could help improve the course?

Comments
Perhaps use the books more than "required reading". I barely did the required reading and have been getting 100% on almost everything.

Exams should more closely reflect class material.
What are the major strengths and weaknesses of the instructor?

Comments

Good professor overall.

Do you have comments on the grading procedures and exams?

Comments

Grading procedures were pretty darn good to me.
Studying quizzes, homeworks, and worksheets was not adequate preparation for the exam.
